Wordpress Rss Feed

In case the Rss feed does not work with this error displayed:

Line Number 2, Column 1:<?xml version="1.0" encoding="UTF-8"?><rss version="2.0"

open `usr/share/wordpress/wp-includes/feed-rss2.php` it with a text editor and read on the very top section, the following code:

```
header('Content-Type: text/xml; charset=' . get_option('blog_charset'), true);  
$more = 1;
```

To fix the feed on wordpress (but not only, it is obviously valid in, and for, any other feed or non feed contest where we can have the same necessity), **add** this tricky Php code immediately after:

```
$out = ob_get_contents();  
$out = str_replace(array("\n", "\r", "\t", " "), "", $input);  
ob_end_clean();
```
