Introduction

This page documents aurovilleguesthouses.org

You will find documentation and source code on **Rose**: /home/share/administration/Supported organisations and projects /bl-programming-projects /aurovilleguesthouses

Blue Light first developed an application to allow the guest house office themselves to update guest house data.

The second part was to redesign the www.aurovilleguesthouses.org interface for users wanting to choose a guest house. It's simpler, more dynamic and efficient than the previous version.

As part of this project the number of guest houses listed on the site increased from 23 to more than 57.

In November 2014, it is more than 70 guest houses and home stays displayed on the website.

Next second semester 2015 is to develop smartphone interface. And start to work on booking on line.
