ImportExportTools NG 11.1

by [Christopher Leidigh](#)

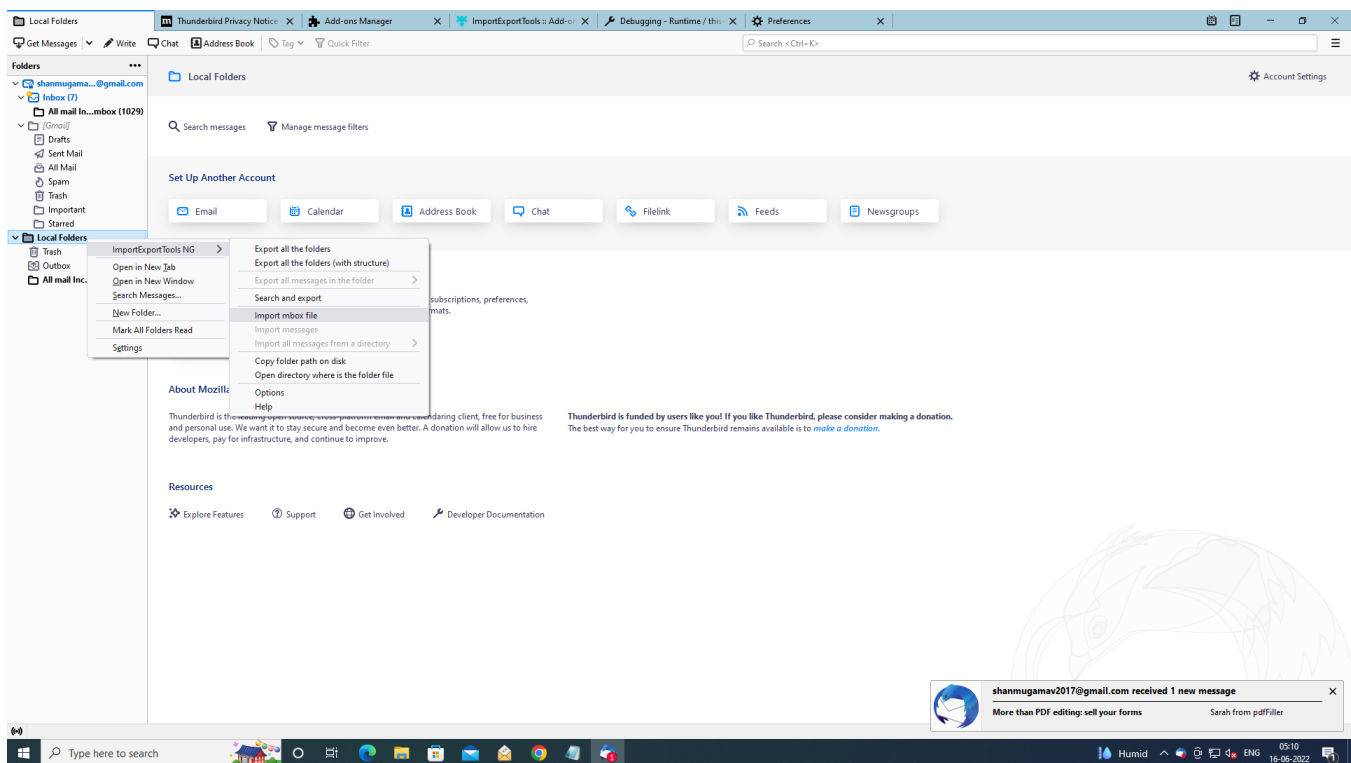

Adds tools to import/export messages and folders (NextGen)

NEW 78/68 Compatible version !

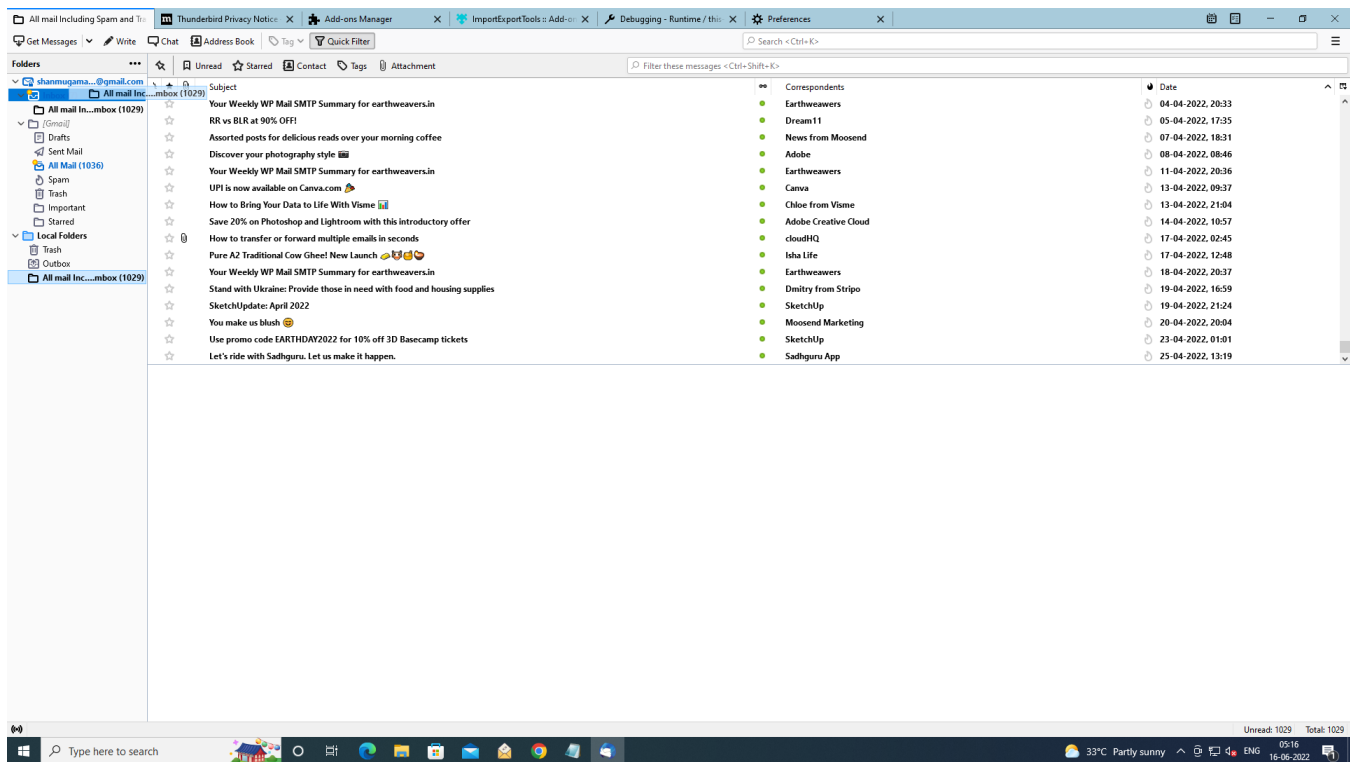

See Changes below

[+ Download Now](#)

- install Thunderbird
- Install the ImportExportTools NG 11.1 addon (Link: <https://addons.thunderbird.net/En-us/thunderbird/addon/importexporttools-ng/>)
- Sign in to your destination email address
- Now right click >local folders (under inbox tool panel) > select ImportExportTools NG > select import mbox file

- Select your .mbox file
- Now you can see all your emails imported from the .mbox file
- Just drag and drop the imported folder into the inbox

- Repeat the drag and drop for sent emails, drafts, etc
- Wait for the copying progress to be done-- see the activity manager on the right bottom for the progress
